WORK EXPERIENCE

2022-2023

HI Internet company

Customer Service

Collaborated with other team members to ensure customer satisfaction and meet team goals. Assisted in processing customer orders, returns, and refunds.

Responded to customer inquiries and resolved their concerns through phone, email, or chat support.

2020 -2021

Yellow Stone Company

Customer Service

- Responded to inbound customer calls in a timely and professional manner.
- Demonstrated excellent problem-solving skills by identifying and resolving complex customer issues.

2018 – 2019

Botany Basketball Club

Basketball Trainer

- Demonstrated proper techniques and provided individualized feedback to help participants improve their skills.
- Promoted teamwork and sportsmanship among the participants.
- Successfully trained a group of juniors in basic and advanced basketball skills.

EDUCATION

2022-2023

Brighter Myanmar

React & Redux & Nextjs

Coursework:

- Learned the fundamentals of React, including components, props, state, and lifecycle methods.
- Studied Redux and its core concepts, such as actions, reducers, and the store.
- Developed a working knowledge of JavaScript and related technologies, including Node.js, NPM, and Webpack.
- Worked on projects that demonstrated your proficiency in React and Redux, including building web applications and interactive user interfaces.

Skills:

- Proficient in React and Redux development.
- Strong knowledge of JavaScript and related technologies.
- Experience working with front-end web development tools and libraries.
- Ability to create responsive and visually appealing user interfaces.
- Familiarity with testing and debugging tools and techniques.

About Me

As a botany student in my final year at Dagon University, I have always been passionate about learning and expanding my knowledge in different areas. Recently, I decided to pursue a career in web development, and I have been teaching myself MERN stack development. Although I am relatively new to the field, I am excited to continue building my skills and knowledge. Before delving into web development, I worked in a call center for three years at a telecom company. Although I did not particularly enjoy the position, it allowed me to gain valuable experience in communication and customer service. These skills have proven to be useful in my current pursuit of web development, as effective communication is essential in any role. Overall, I am a hard-working and driven individual who always eager to learn and grow. I am committed to continuously improving my skills and staying up-to-date with the latest industry trends and technologies.

Projects

Projects Name

1. News Media

- Developed a news media platform that allows users to browse and read news articles with user authentication feature using React, Node.js, Express.js, and MongoDB technologies.
- Designed a responsive and user-friendly front-end interface using React, including components such as forms, modal dialogs, and navigation menus.
- Developed a back-end API using Node.js and Express.js to handle user authentication and authorization, as well as CRUD operations for news articles.
- Utilized MongoDB to store user authentication data and news article information, including article text, images, and author information.
- Implemented user authentication features, including user registration, login, and password reset functionality, using JSON Web Tokens (JWT) and bcrypt for secure password hashing.
- Ensured application security with best practices such as validation, authentication, and authorization techniques.

Skills:

- Proficient in full-stack web development using React, Node.js, Express.js, and MongoDB.
- Strong understanding of web design principles and responsive design.
- Experience with building and integrating back-end APIs with Node.js and Express.js.
- Familiarity with security best practices, including user authentication and authorization, and secure password hashing.

2022-2023

Brighter Myanmar

2018 - 2019

MSquare
Programming

2018 - 2019

CMC (Confucius &
Mencius College)

2016 - 2020

Dagon University

Nodejs & Express & Mongoddb Dababsase

Coursework:

- Studied the fundamentals of Node.js, including asynchronous programming, event-driven architecture, and file system operations.
- Learned how to build web applications using the Express web framework, including middleware, routing, and template engines.
- Gained experience with MongoDB, a popular NoSQL database, including CRUD operations, data modeling, and querying.
- Worked on projects that demonstrated your proficiency in Node.js, Express, and MongoDB, including building RESTful APIs and full-stack web applications.

Skills:

- Proficient in Node.js, Express, and MongoDB development.
- Strong knowledge of JavaScript and related technologies.
- Experience working with front-end web development tools and libraries.
- Ability to create scalable and maintainable web applications.
- Familiarity with testing and debugging tools and techniques.

HTML & CSS & Javascript

Over the course of one year, I committed myself to self-studying HTML, CSS, and JavaScript through various online resources, including YouTube tutorials. Through this self-directed approach, I gained a comprehensive understanding of these programming languages and developed the ability to troubleshoot and problem-solve independently. This experience has demonstrated my dedication to continuous learning and my ability to take the initiative to acquire new skills

Chinese Language

Coursework:

- Completed coursework in Mandarin Chinese, including grammar, vocabulary, reading, writing, and conversation.
- Participated in language immersion activities, such as language exchanges and cultural events.
- Skills:
- Proficient in speaking, listening, reading, and writing Mandarin Chinese.
- Strong knowledge of Mandarin grammar, vocabulary, and pronunciation.

Botany (Final Year Students)

Skills

- Strong knowledge of plant biology and ecology.
- Strong analytical and problem-solving skills.
- Excellent written and oral communication skills.

Final year project:

- Presented findings in a final report and oral presentation to a panel of faculty members.

Relevant coursework:

- Plant anatomy and morphology
- Plant physiology
- Ecology and environmental biology
- Genetics and plant breeding
- Microbiology and biotechnology
- Plant taxonomy and systematics

2. Ecommerce

Collaborated with friends on a movie project using React, Node.js, and MongoDB with Express.js.

Designed and developed a responsive and user-friendly front-end interface using React, including components such as movie listings, search functionality, and user profile pages.

Developed a back-end API using Node.js and Express.js to handle CRUD operations for movie information and user ratings and reviews.

Utilized MongoDB to store movie information, user ratings and reviews, and other related data.

Implemented user authentication and authorization using JSON Web Tokens (JWT) and bcrypt for secure password hashing.

Collaborated with team members on design and functionality decisions, ensuring project met user requirements and expectations.

Utilized version control with Git and collaborated with team members using GitHub or other collaboration tools.

Skills:

Proficient in full-stack web development using React, Node.js, and MongoDB with Express.js.

Strong understanding of web design principles and responsive design.

Experience with building and integrating back-end APIs with Node.js and Express.js.

Knowledge of database design and management with MongoDB.

Familiarity with security best practices, including user authentication and authorization, and secure password hashing.

Experience with collaborating with team members on software development projects.

Understanding of web development best practices, including version control and collaboration tools.

3 . Movie Project Collaboration

- Developed an e-commerce platform that allows users to browse and authentication feature using React, Node.js, Express.js, and MongoDB technologies.
- Designed a responsive and user-friendly front-end interface using React, including components such as product listings, shopping cart, checkout pages, and user profile pages.
- Developed a back-end API using Node.js and Express.js to handle user authentication and authorization, as well as CRUD operations for product information
- Utilized MongoDB to store user authentication data, product information, and user order information, including order status and delivery details.
- Implemented user authentication features, including user registration, login, and password reset functionality, using JSON Web Tokens (JWT) and bcrypt for secure password hashing.
- Ensured application security with best practices such as validation, authentication, and authorization techniques.
- Utilized best practices in web development, including version control with Git and continuous integration and deployment with tools like GitHub Actions or Travis CI.

Skills:

- Intermediate in full-stack web development using React, Node.js, Express.js, and MongoDB.
- Strong understanding of web design principles and responsive design.
- Experience with building and integrating back-end APIs with Node.js and Express.js.
- Knowledge of database design and management with MongoDB.
- Familiarity with security best practices, including user authentication and authorization, and secure password hashing.
- Understanding of e-commerce best practices, including product listings, shopping cart, and checkout process.
- Understanding of web development best practices, including version control and continuous integration
